PROFESSIONAL SUMMARY

Senior Product Designer with 5+ years of experience in digital products and 10 years in Design. I work on complex B2B, B2C and internal platforms across financial services (Bradesco), agribusiness insurance and PropTech. I work end to end across the product lifecycle: Product Discovery, user research (UX Research), journey mapping, information architecture, high-fidelity prototyping, usability testing and Design Systems, combining behavioral data, business goals and technical constraints to inform decisions. I also bring Product Owner experience (backlog and roadmap) and a certification in AI applied to UX and Design Engineering. I helped replace a third-party platform with a proprietary product that was later offered as a white-label solution.

SKILLS

Product & UX: Product Design, UI/UX Design, Product Discovery, User Research (UX Research), user interviews, benchmarking, Design Sprints, Journey Mapping, User Flows, Information Architecture, Sitemaps, Wireframes, High-Fidelity Prototyping, Usability Testing, Interaction Design, UX Writing, Accessibility

Strategy & Delivery: Product Strategy, Product Ownership, Roadmap, Backlog, Prioritization, Agile (Scrum), Stakeholder Workshops, Requirements Definition, Design Documentation and Developer Handoff

Data & AI: Event Tagging and Tracking, User Behavior Analysis, Data-Informed Decisions, AI applied to UX and Design Engineering

Tools: Figma, FigJam, Design Systems, Adobe XD, Photoshop, Illustrator, After Effects, Premiere, InDesign, WordPress/Elementor

Industries: Financial Services / Banking, Insurance (Insurtech / Agribusiness), PropTech, B2B, B2C, Internal Tools, White-Label Platforms, Web and Mobile

PROFESSIONAL EXPERIENCE

Product Designer | Mell.ro

Oct 2025 – Sep 2026

Web and mobile platform for rental management and real estate services (PropTech).

- Redesigned journeys and information architecture for three audiences with distinct needs: property owners, real estate agents and people searching for housing.
- Restructured navigation, sitemap, menus and critical flows across web and mobile, reducing product complexity and making the experience clearer and more accessible.
- Evolved tenant financial analysis flows, defining requirements and product rules together with stakeholders.
- Delivered high-fidelity interfaces and prototypes with functional and front-end documentation for developer handoff.
- Prepared the product experience for user acquisition and Marketing initiatives, aligning usability with growth goals.

Senior Product Designer | Bradesco (via QiBit)

Feb 2025 – Sep 2025

AtendeBra: new internal platform supporting the technicians who serve Bradesco's customers (financial services).

- Led user research and journey mapping from the platform's early conception, turning technicians' needs into requirements, flows and prototypes.
- Centralized information and workflows previously spread across separate interfaces into a single environment, simplifying operations and access to information during customer support.
- Redesigned support workflows to make them faster, clearer and safer, reducing friction and cognitive load in high-pressure tasks.
- Implemented behavioral tagging and tracking to monitor usability, identify friction points and drive data-informed product improvements.

Product Designer & Product Owner | Alper Consultoria em Seguros

Jan 2023 – Feb 2025

AlperAgro: B2B digital platform for agribusiness insurance management, web and mobile.

- Helped replace a third-party platform with a proprietary solution, reducing licensing costs and increasing autonomy over product evolution.
- Led Product Discovery, user research, Design Sprints and usability testing, simplifying processes, reducing rework and incorporating user feedback.
- Built and maintained the platform's Design System, standardizing components and interfaces across Design and Engineering.
- Designed a mobile app for sales agents prospecting agricultural insurance, speeding up commercial operations.
- As Product Owner, prioritized backlog and roadmap based on user needs and feedback, connecting business, Design and Engineering.
- Contributed to a scalable product architecture that enabled the platform to be offered as a white-label solution.
- Case study: [behance.net/gallery/217298261/\(ENG-Version\)-AgrobizUIUX-Product-Design](https://behance.net/gallery/217298261/(ENG-Version)-AgrobizUIUX-Product-Design)

UI/UX Designer | Action Labs Innovation Labs

Feb 2022 – Jan 2023

- Designed systems and applications for new ventures and business models, including sitemaps, user flows, Design System and high-fidelity interfaces.
- Conducted UX Research for product discovery through user interviews, surveys and benchmarking.
- Created landing pages and product communication materials in partnership with Marketing and Sales.

UI/UX Designer & Project Manager | O Positivo Design

Jan 2019 – Dec 2021

- UI/UX Designer (2019): designed interfaces and digital experiences for agency clients.
- Project Manager (2020–2021): managed paid media strategies and customer acquisition campaigns, overseeing timelines, budgets and resources with creative and analytics teams to optimize ROI.

Earlier Design Experience (2016 – 2018)

- **Freelance UI/UX Designer**, Self-employed (Jun 2018 – Dec 2018)
- **Web Designer & Art Director**, Fenac (Jan 2017 – Jun 2018): landing pages, campaigns, branding and visual identity across online and offline channels.
- **Art Director**, Protarget (Jan 2016 – Jun 2016): creative concepts, landing pages and digital content.

EDUCATION

Bachelor's Degree in Design – Feevale University, Novo Hamburgo, Brazil | 2014 – 2021

Associate Degree in Marketing – Uninter, São Leopoldo, Brazil | 2012 – 2014

CERTIFICATIONS & AWARDS

From Figma to App from Scratch: AI applied to UX and Design Engineering (original title: Do Figma ao App do Zero)

Salão Jovem Designer Award (Young Designer Award, Brazil)
